

INTERNSHIP REPORT

On

AI-ASSISTED DATA ANALYTICS AND RESEARCH FOR NGO OUTREACH

Submitted

To

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement for the degree of

B.Tech CSE

By

Roll Number of Student: ___Shreyas Yadav___

Name of Student: __25SCS1003001332__

Batch: __2025-29__

Internship Overview

01

1

Internship Focus

Research, data collection, organization, website analysis and AI-assisted recommendations.

2

Work Style

Mainly non-technical and task-based, with emphasis on practical data and digital work.

3

AI Usage

AI tools used as support for brainstorming, structuring ideas and generating recommendations.

What the internship taught me

- Data analytics is not limited to programming or machine-learning models.
- Useful analysis starts with collecting relevant information and organizing it consistently.
- AI-generated suggestions still need human review, judgment and context.

About InAmigos Foundation

02

Organization

InAmigos Foundation is a non-profit organization working across social-impact areas such as education, women empowerment, animal welfare, environment and community support.

Why the Work Matters

The internship focused on information that can support outreach, volunteer engagement, digital communication and awareness for a social organization.

Education

Women Empowerment

Animal Welfare

Environment

Community Support

Internship Objectives

03

1

Objective

Develop focused online research skills.

2

Objective

Collect and organize information in structured formats.

3

Objective

Analyse a website from a user-experience perspective.

4

Objective

Use AI tools responsibly for ideation and documentation.

5

Objective

Improve analytical thinking and comparison skills.

6

Objective

Strengthen documentation and presentation skills.

Major Tasks Completed

04

T1

NGO Research & Data Collection

Research 10 NGOs in India and organize details such as website , sector, headquarters and initiatives.

T2

Website Improvement Analysis

Review the foundation website and identify improvements in design , content, layout and user experience.

T3

Volunteer Opportunity Data

Compile at least 15 student opportunities with organization, type, eligibility, application information and deadlines.

T5

AI Insights for NGO Growth

Generate five practical AI-assisted recommendations for outreach, volunteer engagement and online presence.

Work Process

05

The work was mainly descriptive and comparative rather than statistical. The goal was to turn unstructured online information into clear, useful outputs.

AI Insights for NGO Growth

06

1

Impact-based storytelling

Share short stories that clearly show what changed because of an activity.

2

Simple volunteer journey

Make it easy to discover, register, participate and stay connected.

3

Consistent social content

Use a manageable mix of impact updates, volunteer stories and calls to action.

4

Track basic engagement

Monitor simple indicators such as registrations, page visits and post engagement.

5

Clear online actions

Make volunteering, donation and contact options easy to find.

Tools & Technologies

07

1

Web browsers & search

Online research and source checking

2

Excel / Google Sheets

Structured data collection and comparison

3

Word / Google Docs

Reports, task documents and documentation

4

Screenshot & annotation

Website analysis and visual suggestions

5

AI tools

Brainstorming, structuring and recommendation support

Learning Outcomes

- Focused online research and information verification
- Data organization using consistent categories
- Basic comparative and descriptive analysis
- Website and user-experience observation
- Responsible use of AI as an assistant
- Clear documentation and presentation
- Better understanding of how data supports social organizations

Key takeaway

**“AI can support the process,
but useful results still depend
on human judgment, relevant
data and clear objectives.”**

Challenges Faced

09

1

Challenge

Finding relevant information across multiple websites.

2

Challenge

Keeping information consistent when sources used different formats.

3

Challenge

Handling changing deadlines and eligibility details for opportunities.

4

Challenge

Reviewing a website from the perspective of a normal visitor.

5

Challenge

Using AI suggestions critically instead of accepting them automatically.

Overall Outcome

11

What I completed

- NGO research and structured data collection
- Website improvement analysis
- Student opportunity compilation
- AI-assisted NGO growth recommendations
- Documentation and presentation of findings

What I gained

- Research and data organization
 - Analytical and comparison skills
 - Basic UX thinking
 - Responsible AI usage
 - Communication and documentation
 - Practical understanding of non-technical data analytics

The internship gave me an early practical understanding of how data and digital tools can support a social organization.

Internship Recognition

11

Regd no. - U85300CT2020NPL010641

CSR - 1 Registered - CSR00083159

80G - AAFCI8183CF20222

1

Internship Certificate

Successful completion of the AI Data Analytics Internship at InAmigos Foundation.

2

Best Intern Recognition

Recognition received for performance during the internship.

3

Appreciation

Certificate recognizing dedicated efforts and contribution.

THANK YOU
